THE JOURNEY BEGINS

l'm Mia. Nice to meet you, um, Captain Chip?

We are white blood cells.

We eat bacteria.

÷

When you have PID, part of your immune system is missing or doesn't work so well. You may not have enough antibodies to protect you.

> We make you vitamins.

> > Good bacteria

200

0

5 This means you may get sick more often, with chest infections, ear aches or tummy problems.

6 Immunoglobulin treatment gives you more antibodies - that means more bodyguards to help fight bacteria and keep you healthy.

MEET THE CHARACTERS

WHAT IS PRIMARY IMMUNODEFICIENCY?

Have you seen the film?

Join IGI and Jamie as they learn about amazing antibodies - and battle bad bacteria!

Share the film of IGI's adventures with your friends, classmates and siblings.

www.leben-mit-pid.ch/igis-abenteuer-video/

JAMIE LOVES ADVENTURES. WHICH IS LUCKY BECAUSE, WITH HIS NEW FRIEND IGI, THERE ARE LOTS OF ADVENTURES AHEAD!

Strange worlds, mysterious machines and a giant, blue, magical... well, we can't give it all away!

When Jamie learns he has primary immunodeficiency, he is worried about how his life might change. Then he meets IGI and discovers a world full of unexpected adventures and new friends.

This is Jamie's story but every child with PID will have their own story. Any medical devices used here are for illustrative purposes only, these may look different to the ones you use where you live.
